9324-RLD700ENE	Studio 5000 PRO EN-Formerly RSLogix	20.03.00 <input type="button" value="v"/>		
<input type="button" value="Lite Download (web only) v"/>			2013/09/26	
NOTICE This release includes enhancements intended to improve product resiliency to potentially disruptive activities. These enhancements may affect product safety, performance, expected life, configuration, or operation of the product. The release does not include functional updates or resolution to known functional issues. The release ensures that only V20.03 software can open, upload, go online with a project/controller created/downloaded from this version. The release will introduce changes to existing behavior of minor revisions of software, including: -Offline interactions between minor revisions of software -Online interaction between controller and software As with previous releases, only one minor revision of software can be installed on a computer at a time. For additional information on this release, refer to Knowledgebase AID #565204
